

CABLE & DISH INSTALLATION RULES

PERMITTED

Cable or dish service at the apartment is only allowed where the dish or cable wires are installed on the common brick in the rear of the building with wiring neatly bundled and not left hanging on said common brick.

Dish installation is permitted on the rear porches and stairways, but never over windows, as long as the dish or wires do not impede movement up or down said stairways. Cable wires may be run within the apartment to rooms that need cable access.

NOT PERMITTED

In no event is dish or cable installation permitted on face brick or side brick of building, or on roof area of any building. Any improper installation shall be removed from the premises, and any charges shall be paid by cable/dish provider and/or the tenant.
